IN THE CLAIMS

The following is a listing of the claims in accordance with 37 C.F.R. §1.121.

- 1. (Original) A package comprising:
 - a flexible substrate comprising a polymeric transparent film;
 - an organic electronic device coupled to the transparent film;
 - a sealant coupled to the flexible substrate and disposed about the perimeter of the organic electronic device; and
 - a superstrate coupled to the sealant and disposed proximate to the organic electronic device.
- 2. (Original) The package, as set forth in claim 1, wherein the flexible substrate comprises the barrier coating.
- 3. (Original) The package, as set forth in claim 1, wherein the flexible substrate is a composite substrate comprising:
 - a first protective layer configured to resist abrasion;
 - a polymeric transparent film coupled to the first protective layer;
 - a barrier coating coupled to the transparent film; and
 - a second protective layer coupled to the barrier coating and configured to protect the transparent film from chemical attach during fabrication.
- 4. (Original) The package, as set forth in claim 1, wherein the flexible substrate is a composite substrate comprising:
 - a first protective layer configured to resist abrasion;
 - a first polymeric transparent film coupled to the first protective layer;
 - a first barrier coating coupled to the first transparent film;
 - a second barrier coating coupled to the first barrier coating via an adhesive layer;

- a second polymeric transparent film coupled to the second barrier coating; and a second protective layer coupled to the barrier coating and configured to protect the transparent film from chemical attach during fabrication.
- 5. (Original) The package, as set forth in claim 1, comprising a barrier coating coupled between the flexible substrate and the organic electronic device.
- 6. (Original) The package, as set forth in claim 1, wherein the organic electronic device comprises an organic light emitting diode.
- 7. (Original) The package, as set forth in claim 1, wherein the organic electronic device comprises an organic photovoltaic device.
- 8. (Original) The package, as set forth in claim 1, wherein the sealant comprises an adhesive material having a low permeability.
- 9. (Original) The package, as set forth in claim 1, wherein the sealant comprises a thickness that is greater than a thickness of the organic electronic device.
- 10. (Original) The package, as set forth in claim 1, wherein the superstrate comprises a metal foil.
 - 11. (Withdrawn) A package comprising:
 - a flexible substrate comprising a polymeric transparent film;
 - an organic electronic device coupled to the transparent film;
 - a sealant coupled to the transparent film and disposed about the perimeter of the organic electronic device; and
 - a superstrate coupled to the sealant and disposed proximate to the organic electronic device, wherein the superstrate comprises a periphery adapted to wrap around edges of the package such that the periphery

of the superstrate is coupled to a side of the flexible substrate opposite the organic electronic device.

- 12. (Withdrawn) The package, as set forth in claim 11, wherein the flexible substrate comprises the barrier coating.
- 13. (Withdrawn) The package, as set forth in claim 11, wherein the flexible substrate is a composite substrate comprising:
 - a first protective layer configured to resist abrasion;
 - a polymeric transparent film coupled to the first protective layer;
 - a barrier coating coupled to the transparent film; and
 - a second protective layer coupled to the barrier coating and configured to protect the transparent film from chemical attach during fabrication.
- 14. (Withdrawn) The package, as set forth in claim 11, wherein the flexible substrate is a composite substrate comprising:
 - a first protective layer configured to resist abrasion;
 - a first polymeric transparent film coupled to the first protective layer;
 - a first barrier coating coupled to the first transparent film;
 - a second barrier coating coupled to the first barrier coating via an adhesive layer;
 - a second polymeric transparent film coupled to the second barrier coating; and
 - a second protective layer coupled to the barrier coating and configured to protect the transparent film from chemical attach during fabrication.
- 15. (Withdrawn) The package, as set forth in claim 11, comprising a barrier coating coupled between the flexible substrate and the organic electronic device.
- 16. (Withdrawn) The package, as set forth in claim 11, wherein the organic electronic device comprises an organic light emitting diode.

- 17. (Withdrawn) The package, as set forth in claim 11, wherein the organic electronic device comprises an organic photovoltaic device.
- 18. (Withdrawn) The package, as set forth in claim 11, wherein the sealant comprises an adhesive material having a low permeability.
- 19. (Withdrawn) The package, as set forth in claim 11, wherein the sealant comprises a thickness that is greater than a thickness of the organic electronic device.
- 20. (Withdrawn) The package, as set forth in claim 11, wherein the superstrate comprises a metal foil.
- 21. (Withdrawn) The package, as set forth in claim 11, comprising a desiccant material disposed within pockets formed by wrapping the edges of the package with the superstrate.
 - 22. (Withdrawn) A package comprising:
 - a flexible substrate comprising a polymeric transparent film;
 - an organic electronic device coupled to the transparent film;
 - a sealant coupled to the transparent film and disposed about the perimeter of the organic electronic device;
 - a superstrate coupled to the sealant and disposed proximate the organic electronic device; and
 - an edge seal coupled to each of the flexible substrate and the superstrate and configured to hermetically seal peripheral edges of the package.
- 23. (Withdrawn) The package, as set forth in claim 22, wherein the flexible substrate comprises the barrier coating.

- 24. (Withdrawn) The package, as set forth in claim 22, wherein the flexible substrate is a composite substrate comprising:
 - a first protective layer configured to resist abrasion;
 - a polymeric transparent film coupled to the first protective layer;
 - a barrier coating coupled to the transparent film; and
 - a second protective layer coupled to the barrier coating and configured to protect the transparent film from chemical attach during fabrication.
- 25. (Withdrawn) The package, as set forth in claim 22, wherein the flexible substrate is a composite substrate comprising:
 - a first protective layer configured to resist abrasion;
 - a first polymeric transparent film coupled to the first protective layer;
 - a first barrier coating coupled to the first transparent film;
 - a second barrier coating coupled to the first barrier coating via an adhesive layer;
 - a second polymeric transparent film coupled to the second barrier coating; and
 - a second protective layer coupled to the barrier coating and configured to protect the transparent film from chemical attach during fabrication.
- 26. (Withdrawn) The package, as set forth in claim 22, comprising a barrier coating coupled between the flexible substrate and the organic electronic device.
- 27. (Withdrawn) The package, as set forth in claim 22, wherein the organic electronic device comprises an organic light emitting diode.
- 28. (Withdrawn) The package, as set forth in claim 22, wherein the organic electronic device comprises an organic photovoltaic device.
- 29. (Withdrawn) The package, as set forth in claim 22, wherein the sealant comprises an adhesive material having a low permeability.

- 30. (Withdrawn) The package, as set forth in claim 22, wherein the sealant comprises a thickness that is greater than a thickness of the organic electronic device.
- 31. (Withdrawn) The package, as set forth in claim 22, wherein the superstrate comprises a metal foil.
- 32. (Withdrawn) The package, as set forth in claim 22, comprising a desiccant material disposed within pockets formed by the edge seal.
- 33. (Withdrawn) The package, as set forth in claim 22, wherein the edge seal comprises a metal foil.

34 – 46. (Canceled)
